

Bill Impacts of Proposed Rates & Comparative Agencies

- Key to Understanding Bill Impact Graphs:
 - Each slide has customer class & meter size
 - “Cumulative % of Bills” graph line represents total % of bills issued in District at or below that consumption level (i.e. on following chart, Single Family $\frac{3}{4}$ ” meter, 71% of all bills in the District are at or below 40 HCF)
 - “Current Bill” & “Proposed Bill” bars are \$ amount of current bill compared to the bill total for the proposed rates
 - “Bill Impact” graph line is the % change in current bill compared to the bill total for the proposed rates
- SDCWA Member Agency Rate Comparison Graphs:
 - Graphs show other San Diego County Water Authority water agencies bills for meter size & consumption shown versus District’s current bill & proposed bill

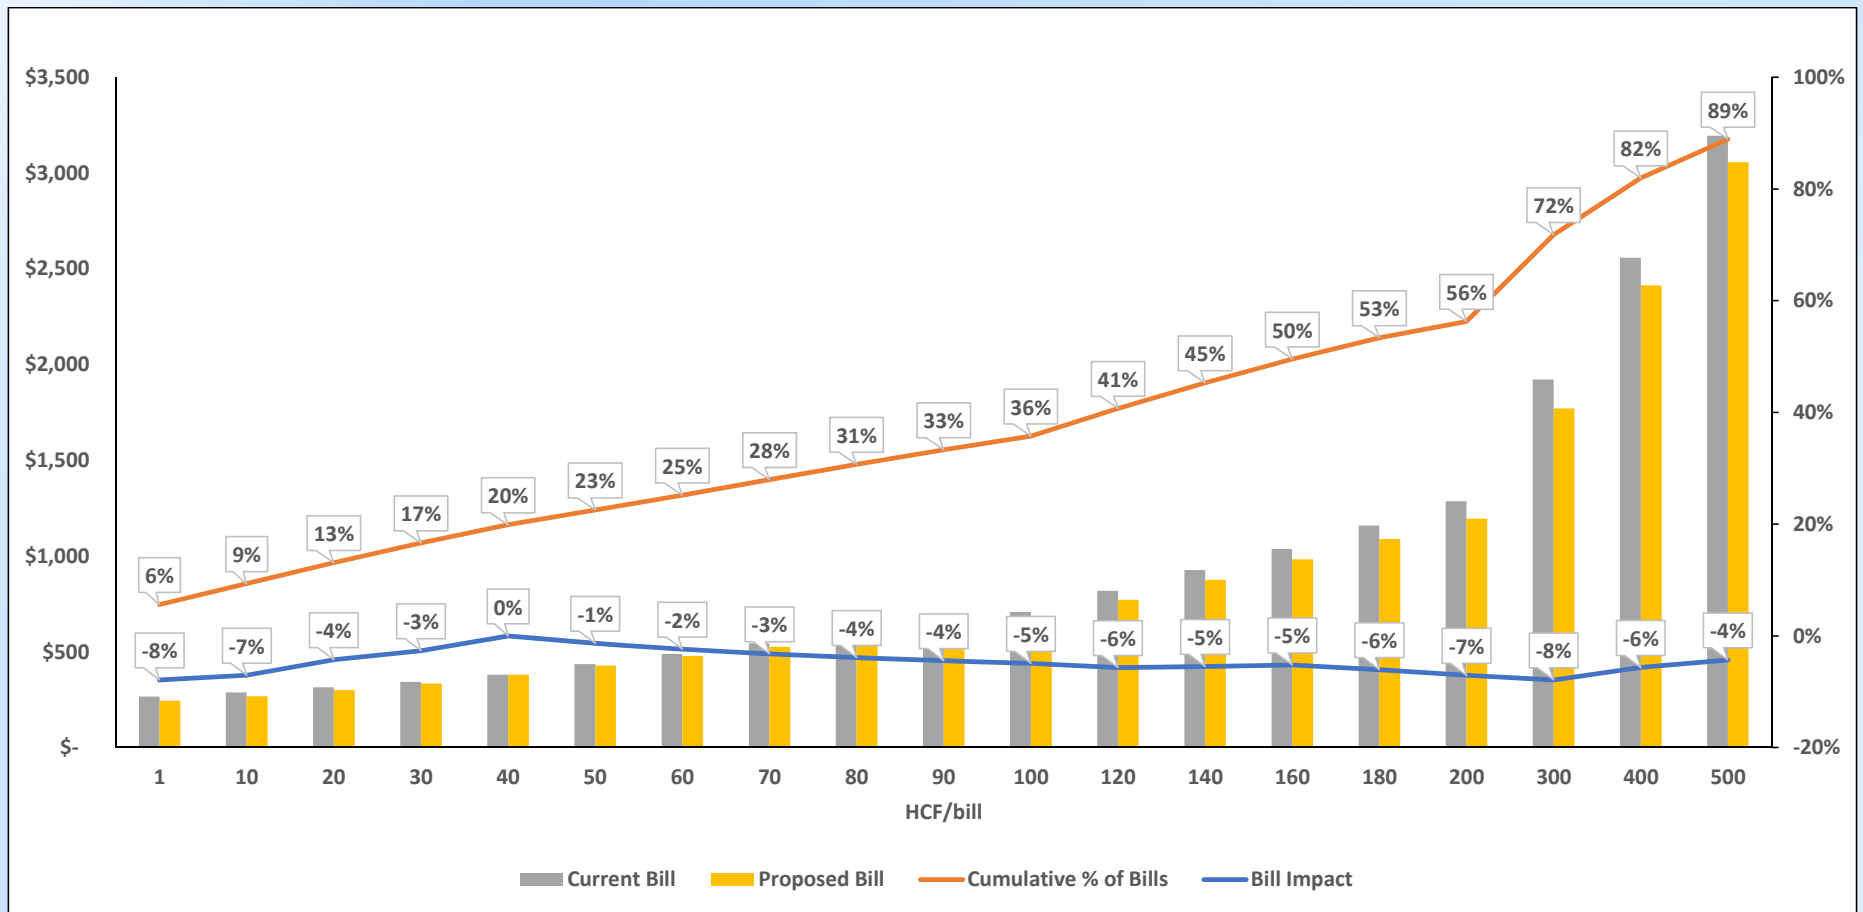

SFR 3/4" meter

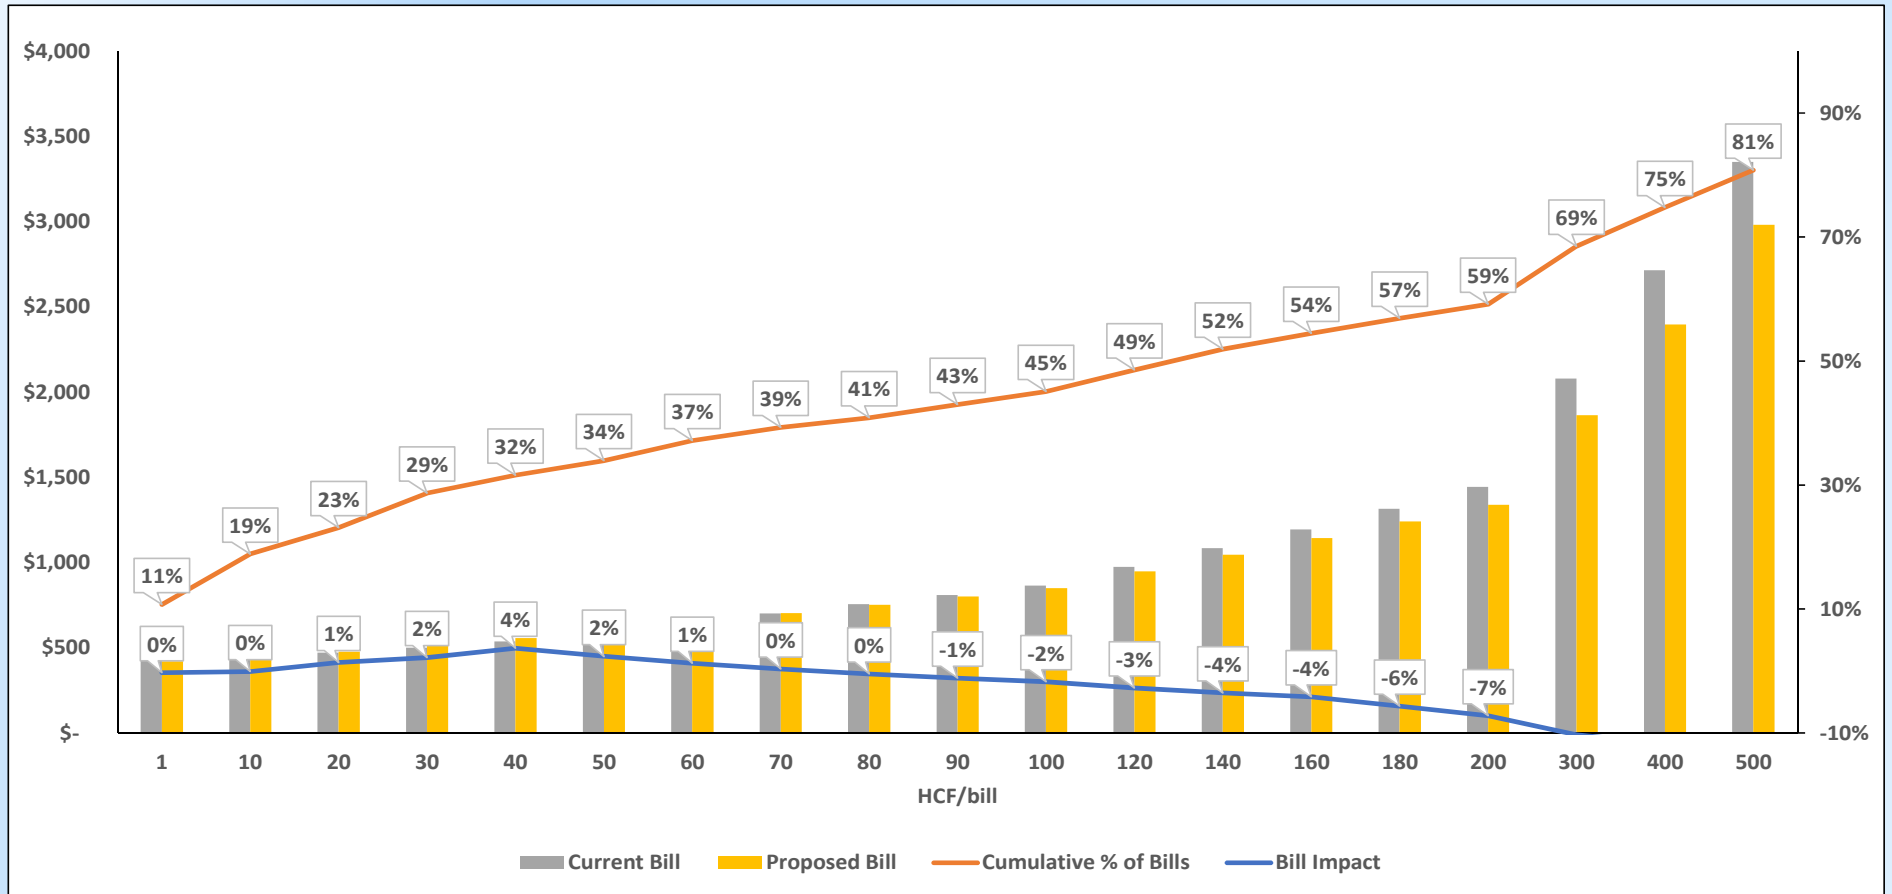

SFR 1" meter

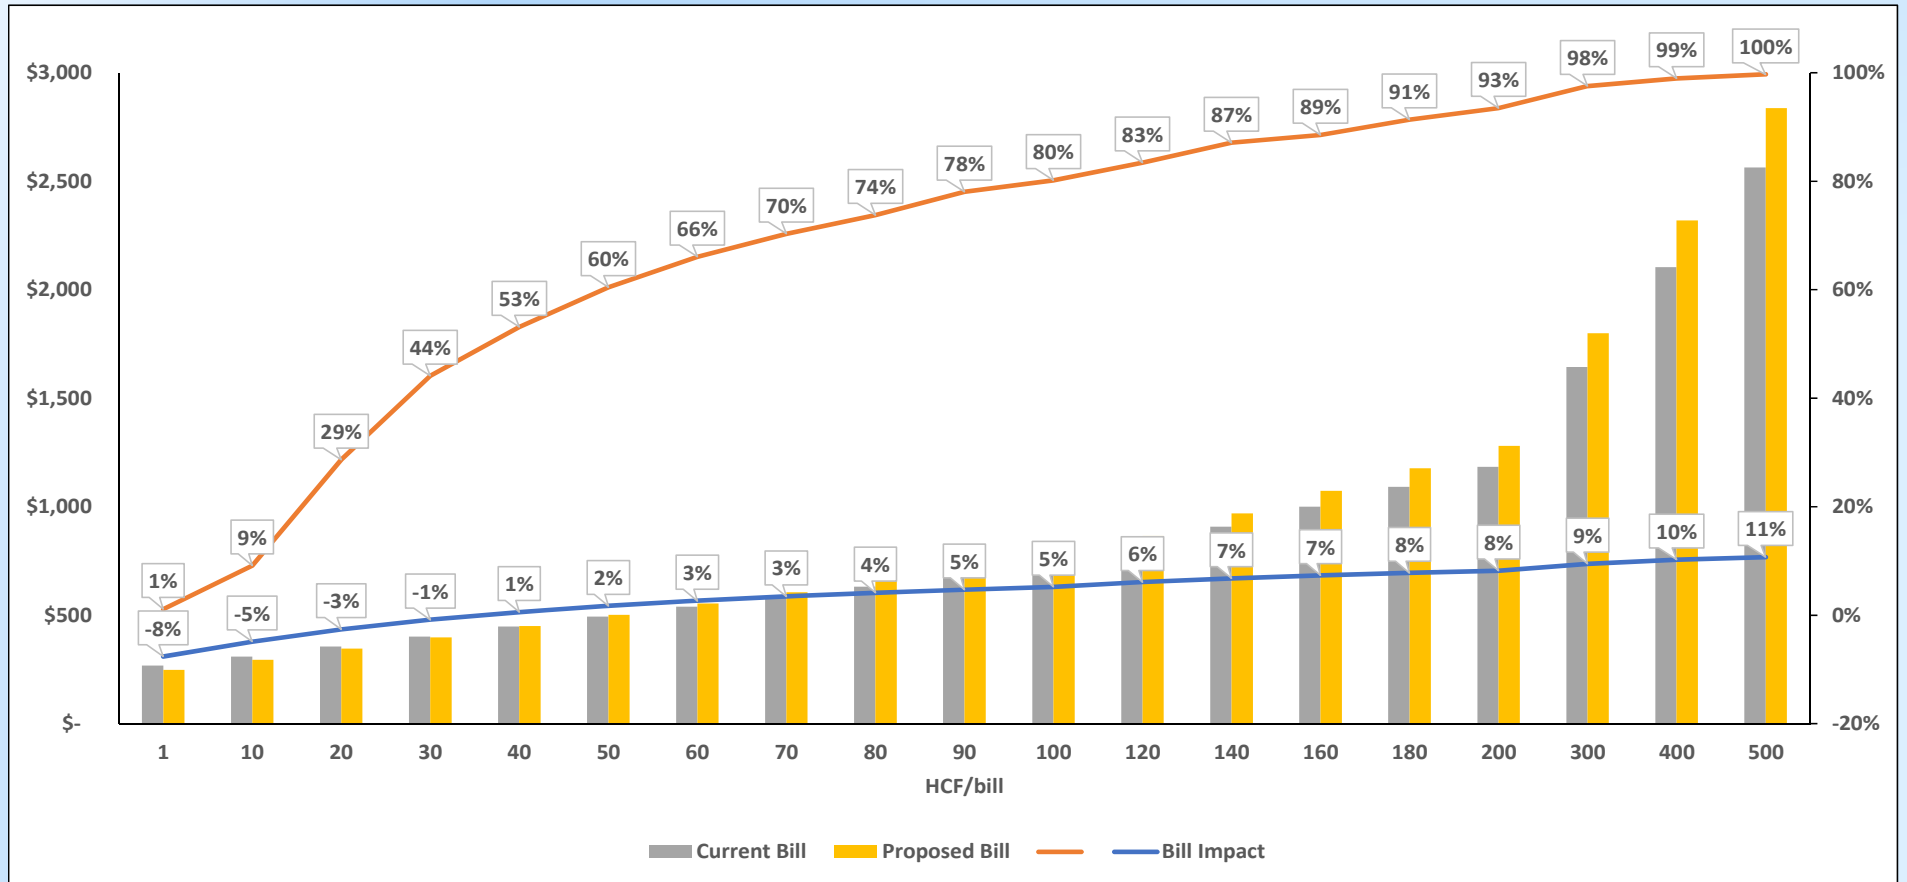

SFR 1.5" meter

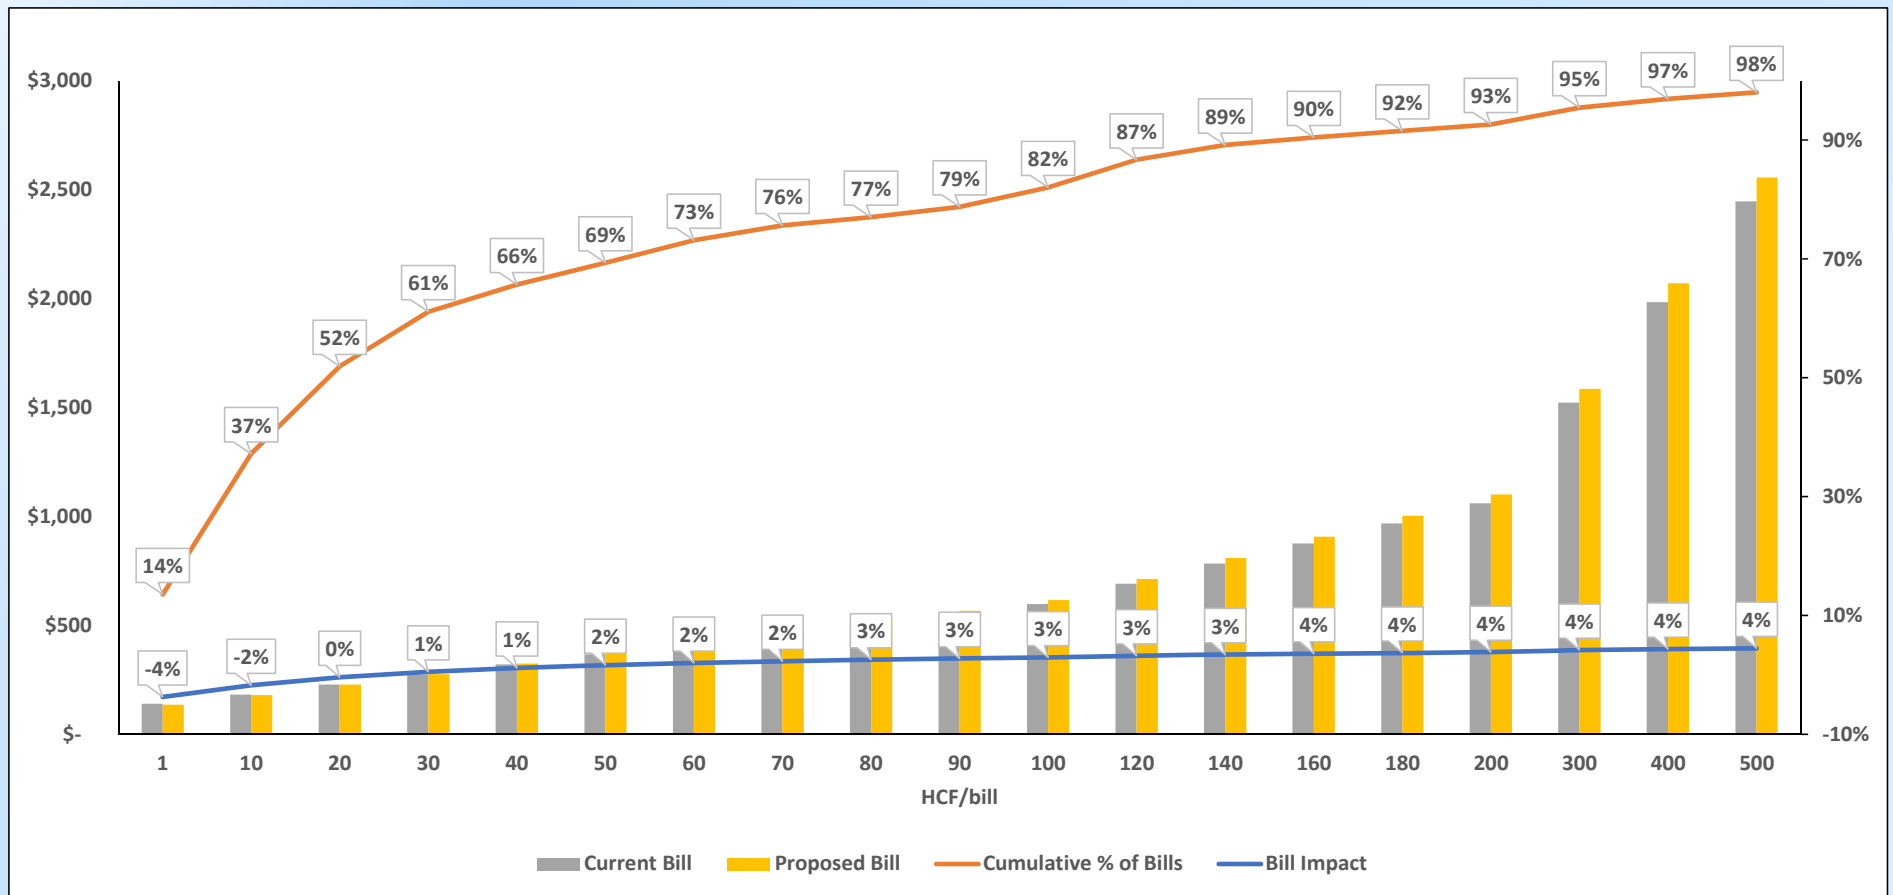

SFR 2" meter
